INSTRUCTIONS

Duration: 4 Hours
Total Marks: 100

1. Read all examination requirements carefully before beginning the practical task.
2. You are required to design and develop a professional website for **Cheap Hardware Ltd.**
3. Ensure that all navigation links work correctly and that all pages are properly connected.
4. Use appropriate and meaningful content related to **Cheap Hardware Ltd.**
5. Organize your project files properly using appropriate folders for HTML files, images, videos, and other resources.
6. All images, videos, and other resources used must be relevant to the website.
7. Save your work regularly to avoid loss of data.

QUESTION NO.1

You have been appointed as the **Manager and Website Developer** of a large hardware company called **Cheap Hardware Ltd.**

The company specializes in selling building materials, construction equipment, plumbing materials, electrical equipment, tools, paints, roofing materials, and other hardware products.

Management has tasked you with designing and developing a **professional, attractive, responsive, and user-friendly company website** to promote the company and its products online.

You are required to develop the website using **HTML**. You may use photos where necessary to improve beauty and user experience.

The website must contain the following major pages:

1. Home
2. About Us
3. Products
4. Our Team
5. Contact Us
