WEBSITE PROGRAMMING

INSTRUDUCTIONS:

Read the following Questions and Answer them, Using Web Programing Tools i.e **Note Pad ++ , Web Browser** Etc.

Submission Deadline: 6th,November, 2025
TOPIC: Introduction to CSS

QUESTION:

You are required to create a simple website with the following specifications:

Pages:

1. **Home Page (index.html)**
    - Include a welcoming message and navigation links to the other pages.
2. **About Page (about.html)**
    - Provide information about the website or organization.
3. **Services Page (services.html)**
    - Create a table that lists three services offered, including columns for service name and description.
4. **Contact Page (contact.html)**
    - Include a form with fields for name, email, and a submit button.

CSS Styling:

- Create a separate CSS file (styles.css) to style the website.
- **Header:**
    - Set a background color and text color for the header.
- **Navigation:**
    - Style the navigation links to display inline, with appropriate spacing.
- **Main Content:**
    - Add padding to the main content area and set a default font family.
- **Table:**
    - Style a table with borders, padding, and header background color.
- **Form Inputs:**
    - Style form inputs with padding, border radius, and border color.
- **Footer:**
    - Center-align footer text and give it a background color.
- **Media Queries:**
    - Implement a media query that adjusts font sizes on smaller screens (e.g., less than 600px).
