emetack®
EXPLORE ENDLESS POSSIBILITIES TOGETHER

WEBSITE PROGRAMMING

Instructions

- Complete all tasks below.
- Use HTML, CSS, and JavaScript for your implementation.
- Submit your code along with images in a ZIP folder to your Emetack app.

QUESTION NO.1

(a) Create an Information Page

- Develop a web page titled "**Discover Uganda**".
- Include:
  - A header with the title "**Discover Uganda**".
  - A navigation bar with links to **"Home", "Culture", "Tourism",** and **"Contact".**
  - A main content section with:
    - A brief description of Uganda.
    - An image representing Ugandan culture (use a placeholder image).
  - A footer with links to social media (Facebook, Twitter).

(b) Style the Page

- Use CSS to style the page.
- Ensure the navigation bar is horizontal and visually appealing.
- Apply a color scheme that reflects Ugandan culture (e.g., national colors: black, yellow, red).

(c) Responsive Design

- Ensure the page is responsive.
- Use media queries to adjust the layout for mobile screens, ensuring readability and usability.

SUBMISSION GUIDELINES

- Submit a ZIP file containing:
  - An HTML file (e.g., `index.html`)
  - A CSS file (e.g., `styles.css`)
  - A JavaScript file (e.g., `script.js`)
  - Any images or additional resources used.
